Profile

Recent Computer Science graduate who brings creative ideas and elegant solutions. Proficient in Front-End and Back-End technologies with a strong technical background. Looking for growth opportunities to try new technologies and expand my technical skills.

Work Experience

Optum – Data Developer
May 2022 – March 2023
- 3 Mouth Coding Bootcamp learning Java, SQL, Databases, Back-End and Front-End development
- Wrote, executed, and automated queries to run using Databricks that collected and arranged medical data into a useful form for data analytics
- Built SQL tables in Snowflake to be populated with billions of individual records and used in a live production environment
- Performed code reviews for team members on GitHub
- Participated in daily standups

Projects

Online News Aggregator
- https://github.com/Elliot-Clark/News-Aggregator
- Full-stack MERN web app that utilizes web scraping and AI to gather, save, and summerize daily news headlines.

Auto Minesweeper
- https://github.com/Elliot-Clark/Auto-Minesweeper
- Python project that automates solving Minesweeper by reading data on screen and programmatically controlling your mouse

Crate and Barrel Chrome Extension
- https://github.com/Elliot-Clark/Crate-Barrel-to-Fedex-Extension
- Used to simplify and automate shipping processes in Crate and Barrel warehouses
- Removed possibility of human error in addition to saving hours of work on data entry
